Evidence, feedback and support controls

Domain	Program control
Formative evidence	Every named section has one embedded activity, exactly 10 feedback-rich MCQs and one scaffolded higher-order response saved browser-locally. These are formative unless a current approved notification says otherwise.
Feedback	Use option-specific feedback, two capstone success criteria, conferencing, annotated design evidence and teacher-observed practical checkpoints. Do not infer practical competence from browser records.
Differentiation	Use TT4-ADJ-01 to adjust complexity, pacing and evidence mode; pre-teach vocabulary; chunk the read-select-explain-check scaffold; use keyboard/touch and complete non-video alternatives. Individual adjustments remain plan- and teacher-controlled.
Literacy/numeracy/digital	Teach textiles vocabulary, annotation and evidence-based explanation; use pattern/measurement/test data only from current approved sources; require traceable digital inspiration and privacy-safe browser-local evidence.
Safety/workplace	The site never authorises independent practical work. Current teacher demonstration, equipment, pattern source, local risk controls and stop-check-ask decisions control every practical block.
Resources	Ten module presentations; 30 theory sections; 50 purposeful visuals; 30 media/non-video pathways; Busy Work activity bank; autosaving folio; assessment orientation; Teacher Resources and Sources routes.
Puzzles	No separate puzzle route is claimed. The integrated candidate uses concept-linked Applied Learning Activities in every section and the Busy Work bank.

Assessment boundary: Formal task number/name, issue and due dates, weighting/marks, current outcome allocation, rubric, compulsory evidence and submission method remain Teacher to confirm. The current site is assessment orientation only.
